

ABSTRACT OF THE DISCLOSURE

[0091] Systems and techniques relating to associating a procedure with actions and

5 resources are described. In general, in one implementation, the technique includes:

specifying a list of one or more actions corresponding to a specified procedure and, for

each action, one or more resources associated with the action; indicating an action order,

including indicating whether two or more actions in the action list are to be performed in

an order-dependent manner or in an order-independent manner; formatting the list of

10 actions into a presentation format; and enabling a user to access the resources associated

with the specified procedure. The actions can be grouped into one or more phases and a

navigation model may include a phase indicator to navigate by phases of the procedure

and display of actions and deliverables associated with a phase. The techniques can

include associating deliverables, contributors and resources with an action. A display can

15 be provided for tracking the status of deliverables, contributors, resources or the

completion of the procedure.
